- OK,Now click run button to see this effect!

About antialiasing

When you run the demo, you may see a lot of aliasing on the screen, So we recommend that you turn on anti aliasing and set it to 4x or 8x. You can see the difference between the two photos。

Anti-aliasing Off

Anti-aliasing 8x

You can click Edit menu, select Project Setting, select Quality,like this:
